

The image displays a 10x20 grid of squares. The pattern is highly symmetrical, both horizontally and vertically. The top half of the grid (rows 1-5) is predominantly white, with black squares forming a sparse, repeating pattern. The bottom half (rows 6-10) is predominantly black, with white squares forming a similar sparse, repeating pattern. The central vertical line (column 10) is a key axis of symmetry. The overall effect is a complex, fractal-like structure that repeats itself across the grid.

☐ ☐ ☐

A 20x20 grid of squares, some filled and some empty, representing a sparse matrix. The pattern of filled squares is non-uniform, with some rows having more filled squares than others. The grid is composed of small squares, with some squares being filled (black) and others being empty (white). The filled squares are scattered throughout the grid, with some clusters and some empty spaces.
