[illegible]

A 7x25 grid of squares representing a binary image. The squares are arranged in a pattern that resembles a stylized, abstract shape, possibly a letter or a logo, with varying densities of squares across the rows.

[illegible]

The diagram consists of four horizontal rows of small squares. The top three rows each contain 20 squares, while the bottom row contains 10 squares.

A 10x25 grid of small squares. The squares are arranged in 10 rows and 25 columns. Some squares are filled with black ink, while others are empty. The pattern of filled squares is sparse and irregular, with some rows having more filled squares than others. For example, the first row has 18 filled squares, while the second row has 24 filled squares. The overall distribution is roughly uniform across the grid.
