

□ □ □ □ □ □ □

The image shows a 10x20 grid of squares. The squares are arranged in a pattern that resembles a stylized, abstract shape, possibly a letter or a logo. The pattern is composed of black squares on a white background. The shape is roughly rectangular, with some internal details that suggest a specific form, though it is abstract and stylized.

The diagram consists of four horizontal rows of small squares:

- Row 1 (top):** A continuous sequence of 28 squares.
- Row 2:** A continuous sequence of 27 squares, starting from the left edge of the first row.
- Row 3:** A sequence of 16 squares, starting from the left edge of the first row.
- Row 4 (bottom):** A sequence of 3 squares, starting from the left edge of the first row.

A 10x20 grid of squares, some filled and some empty, representing a sparse matrix. The pattern of filled squares is symmetric about the main diagonal, which is entirely filled. The distribution of filled squares is dense near the diagonal and becomes sparser towards the corners.

☐ ☐ ☐

[illegible]

A 3x20 grid of squares. The top row has 19 squares, with the 10th square missing. The middle row has 20 squares. The bottom row has 19 squares, with the 10th square missing.

□ □ □ □

A 20x20 grid of black squares on a white background, representing a sparse matrix. The squares are distributed across the grid, with some rows and columns being more populated than others. The pattern is irregular and non-symmetric.
